Khao Wang, Ban Khao Khrai

The hill is to the west of Ban Khao Khrai.

The caves of this mountain range are shown in Thai on an old piece of wood. There are numerous caves at the foot of the cliff, very often ending in a few tens of metres at an old fill or massive formations. One chamber had a species of bat of about 50 cm big and a gallery floored with dry gourds. Several big entrances high up and probably a deep resurgence at the base of the massif, but difficult to access (vegetation of bamboo and other things made progress painful).

These caves were visited by Thierry Tournier in 2010.
